Inheritance David Mulwa 2004

**Teaching Secondary School Mathematics: Techniques And Enrichment** Alfred S Posamentier 2020-09-18 The primary aim of this book is to provide teachers of mathematics with all the tools they would need to conduct most effective mathematics instruction. The book guides teachers through the all-important planning process, which includes short and long-term planning as well as constructing most effective lessons, with an emphasis on motivation, classroom management, emphasizing problem-solving techniques, assessment, enriching instruction for students at all levels, and introducing relevant extracurricular mathematics activities. Technology applications are woven throughout the text. A unique feature of this book is the second half, which provides 125 highly motivating enrichment units for all levels of secondary school mathematics. Many years of proven success makes this book essential for both pre-service and in-service mathematics teachers.

Women of Owu Femi Osofisan 2006 This is an African retelling of Euripides: an unnervingly topical story of a people and a beloved city destroyed by the brutality of war. The play was first performed in Lagos in 2003 under the distinguished director Chuck Mike, and subsequently toured the UK.

Our Underachieving Colleges Derek Bok 2009-02-28 Drawing on a large body of empirical evidence, former Harvard President Derek Bok examines how much progress college students actually make toward widely accepted goals of undergraduate education. His conclusions are sobering. Although most students make gains in many important respects, they improve much less than they should in such important areas as writing, critical thinking, quantitative skills, and moral reasoning. Large majorities of college seniors do not feel that they have made substantial progress in speaking a foreign language, acquiring cultural and aesthetic interests, or learning what they need to know to become active and informed citizens. Overall, despite their vastly increased resources, more powerful technology, and hundreds of new courses, colleges cannot be confident that students are learning more than they did fifty years ago. Looking further, Bok finds that many important college courses are left to the least experienced teachers and that most professors continue to teach in ways that have proven to be less effective than other available methods. In reviewing their educational programs, however, faculties typically ignore this evidence. Instead, they spend most of their time discussing what courses to require, although the lasting impact of college will almost certainly depend much more on how the courses are taught. In his final chapter, Bok describes the changes that faculties and academic leaders can make to help students accomplish more. Without ignoring the contributions that America's colleges have made, Bok delivers a powerful critique--one that educators will ignore at their peril.

Invisible Man Ralph Ellison 2016-08-18 Invisible Man is a milestone in American literature, a book that has continued to engage readers since its appearance in

1952. A first novel by an unknown writer, it remained on the bestseller list for sixteen weeks, won the National Book Award for fiction, and established Ralph Ellison as one of the key writers of the century. The nameless narrator of the novel describes growing up in a black community in the South, attending a Negro college from which he is expelled, moving to New York and becoming the chief spokesman of the Harlem branch of "the Brotherhood", and retreating amid violence and confusion to the basement lair of the Invisible Man he imagines himself to be. The book is a passionate and witty tour de force of style, strongly influenced by T.S. Eliot's *The Waste Land*, Joyce, and Dostoevsky.

**Welcome to Teacher Education**

**Homesick in Paradise** Theophilus Enemali 2015-11-04

*Homesick in Paradise* is a wonderfully written novel that you can't read once and drop but read it time and time again. The lead story has a personal emotional touch that draws you so close to empathizing with an eleven year old character, Enemona, who couldn't bear the heat of his mother's death, decides to break barrier in order to have a spiritual verbal communion with the dead mother. Would the dead mother respond in a mysterious way? The author similarly weaved the childhood memories of a child in a boarding secondary school with its fun and fabulous fury. It espouses the split personality of a nearly indoctrinated child in Christendom, with the conflict of participating in the rich culture of his African traditional festivals. It is an impressive narration laced with tragic stories but also harmonized with great hilarious stories that are didactic and perhaps ribs cracking.

**Examination Questions and Answers in Basic Anatomy and Physiology** Martin Caon 2016-10-11 This book provides two thousand multiple choice questions on human anatomy and physiology, separated into 40 categories. The answer to each question is accompanied by an explanation. Each category has an introduction to set the scene for the questions to come. However not all possible information is provided within these Introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The questions have been used in examinations for undergraduate introductory courses and as such reflect the focus of these particular courses and are pitched at the level to challenge students that are beginning their training in anatomy and physiology. The questions and answer combinations are to be used both by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition & dietetics, health sciences and students taking an anatomy and physiology course as an elective.

*Always Consumed* Skyla Madi 2015-02-13 In the beginning, you have sex. Lots of it. Then, somewhere in the middle, you lose it. Olivia and Seth are stuck in a rut--a busy, sexless rut--and with Valentine's day fast approaching, Olivia wants to force them out of their comfort zones and into fresher waters. Seth, however, believes the trick to recapturing their passion lies in their

beginning. With plans in motion this Valentine's day, Seth and Olivia attempt to rekindle their spark. Does Seth have what it takes to sweep Olivia off her feet all over again? Or is the rut too sticky to pull themselves out of?

The Travels of a T-Shirt in the Global Economy Pietra Rivoli 2009-03-03 Pietra Rivoli is an economics professor at Georgetown University, where the question "Who made your T-shirt?" set her on a quest. On her journey she found that globalization is just as much about history and politics as it is about economics.

Harvest of Corruption Frank Ogodo Ogbeche 2005

Glass Town Steven Savile 2017-12-05 Steven Savile is an international sensation, selling over half a million copies of his novels worldwide and writing for cult favorite television shows including Doctor Who, Torchwood, and Stargate. Now, he is finally making his US debut with Glass Town, a brilliantly composed novel revolving around the magic and mystery lurking in London. There's always been magic in our world We just needed to know where to look for it In 1924, two brothers both loved Eleanor Raines, a promising young actress from the East End of London. She disappeared during the filming of Alfred Hitchcock's debut, Number 13, which itself is now lost. It was the crime of the age, capturing the imagination of the city: the beautiful actress never seen again, and the gangster who disappeared the same day. Generations have passed. Everyone involved is long dead. But even now their dark, twisted secret threatens to tear the city apart. Joshua Raines is about to enter a world of macabre beauty, of glittering celluloid and the silver screen, of illusion and deception, of impossibly old gangsters and the fiendish creatures they command, and most frighteningly of all, of genuine magic. He is about to enter Glass Town. The generations-old obsession with Eleanor Raines's unsolved case is about to become his obsession, handed down father-to-son through his bloodline like some unwanted inheritance. But first he needs to bury his grandfather and absorb the implications of the confession in his hand, a letter from one of the brothers, Isaiah, claiming to have seen the missing actress. The woman in the red dress hadn't aged a day, no matter that it was 1994 and she'd been gone seventy years. Long buried secrets cannot stay secrets forever. Hidden places cannot stay hidden forever. The magic that destroyed one of the most brutal families in London's dark history is finally failing, and Joshua Raines is about to discover that everything he dared dream of, everything he has ever feared, is waiting for him in Glass Town.

Fundamentals of Guidance Bruce Shertzer 1981

Adapting Technology for School Improvement David W. Chapman 2004

**Innovations in Science and Technology Education** David Layton 1994

The Potter's Wheel Vincent Chukwemeka Ike 2020-10 This is About a pampered boy, Obuechina Maduabuchi.....Only brother of five older sisters and a younger one, prize pupil in school, apple of his doting mother's eye, eight years old and hopelessly spoiled. In a vain attempt to salvage his character, his father decides he must be sent away as houseboy to a teacher and his wicked wife.

**The Successors** Jerry Agada 2007

**The Greeks on Stage** Geraldine McCaughrean 2002 Greek myths are high priority in schools and Geraldine McCaughrean's brilliant idea of turning them into short plays for children to perform should be a winner. These twenty-five favourites include King Midas, Perseus and Andromeda, Orpheus and Eurydice, and Theseus and the Minotaur. They can be performed singly or several in one performance, for which a dramatic framework has been supplied. They are easy to stage, with casts that can be expanded or contracted, and there are notes and suggestions for simple props and costumes. Enhanced by

Richard Brassey's line drawings, these plays are as much fun to read as they are to perform.

Fundamentals of Radio Astronomy Jonathan M. Marr

2015-11-30 As evidenced by five Nobel Prizes in physics, radio astronomy in its 80-year history has contributed greatly to our understanding of the universe. Yet for too long, there has been no suitable textbook on radio astronomy for undergraduate students. Fundamentals of Radio Astronomy: Observational Methods is the first undergraduate-level textbook exclus

The Good Study Guide Andrew Northedge 2005-01-01

Developing your learning skills is one of the best investments you can make. We all need to be lifelong learners now. Whether you are an experienced student or just starting out this book will stimulate, guide and support you. It will make you think about yourself and how your mind learns. And it will change forever the way that you study. Topics include:- motivating yourself and managing your time- taking full advantage of your computer- reading with concentration and understanding- developing flexible note-taking strategies- getting the most from seminars and workshops- making presentations- researching online- handling numbers and charts with confidence- writing clear, well argued assignments- doing yourself justice in exams. Getting Textbooks to Every Child in Sub-Saharan Africa

Birger Fredriksen 2015-05-22 Textbooks play a key role in enhancing the quality of learning, especially in the context of low-income Sub-Saharan African (SSA) countries characterized by large class-size, poorly motivated and inadequately trained teachers, and short effective school years. There are also high rates of illiteracy among parents and few reading materials at home for the student to bank on. Despite extensive investments by governments, the World Bank and other development partners, the majority of students in primary and secondary schools in SSA still lack the benefit of access to textbooks and the key reason for this shortage is affordability: textbooks are generally much more costly in SSA than in other developing regions. The need to increase access to key learning resources is of particular urgency because most African countries experience low learning outcomes which in part contributes to a high drop-out rate. Only two-thirds of those who enter school reach the final grade and only about half of these master basic numeracy and literacy skills. And although quality improvement depends on many factors inside and outside the school, there is wide agreement that availability of textbooks is both an indispensable and a cost-effective way of improving the quality of the learning process. A recent World Bank study examined the actual costs of textbooks, the scope for cost reduction, the portion of a national budget countries allocate to teaching and learning materials (TLMs) and hurdles in the way of making textbooks available to student. Some interesting findings from the study - - The availability of affordable textbooks to all students could be dramatically improved by devoting an estimated 3 to 4 percent of the primary education budget and 6 to 7 percent of the secondary education budget - The production process † methods, copyright, length of print runs, effective procurement practices † rather than the production costs should be the target of cost saving strategies - The increased integration of ICTs into education in SSA can provide important opportunities for promoting availability of electronic TLMs but electronic TLMs are not a substitute for printed TLMs including textbooks

The Promise of Hope Kofi Awoonor 2014-03 Kofi Awoonor, one of Ghana's most accomplished poets, had for almost half a century committed himself to teaching, political engagement, and the literary arts. The one constant that guided and shaped his many occupations and roles in life was poetry. The Promise of Hope is a beautifully edited

collection of some of Awoonor's most arresting work spanning almost fifty years. Selected and edited by Awoonor's friend and colleague Kofi Anyidoho, himself a prominent poet and academic in Ghana, *The Promise of Hope* contains much of Awoonor's most recent unpublished poetry, along with many of his anthologized and classic poems. This engaging volume serves as a fitting contribution to the inaugural cohort of books in the African Poetry Book Series.

Developing and Validating Test Items Thomas M. Haladyna 2013-07-18 Since test items are the building blocks of any test, learning how to develop and validate test items has always been critical to the teaching-learning process. As they grow in importance and use, testing programs increasingly supplement the use of selected-response (multiple-choice) items with constructed-response formats. This trend is expected to continue. As a result, a new item writing book is needed, one that provides comprehensive coverage of both types of items and of the validity theory underlying them. This book is an outgrowth of the author's previous book, *Developing and Validating Multiple-Choice Test Items*, 3e (Haladyna, 2004). That book achieved distinction as the leading source of guidance on creating and validating selected-response test items. Like its predecessor, the content of this new book is based on both an extensive review of the literature and on its author's long experience in the testing field. It is very timely in this era of burgeoning testing programs, especially when these items are delivered in a computer-based environment. Key features include ... Comprehensive and Flexible – No other book so thoroughly covers the field of test item development and its various applications. Focus on Validity – Validity, the most important consideration in testing, is stressed throughout and is based on the Standards for Educational and Psychological Testing, currently under revision by AERA, APA, and NCME Illustrative Examples – The book presents various selected and constructed response formats and uses many examples to illustrate correct and incorrect ways of writing items. Strategies for training item writers and developing large numbers of items using algorithms and other item-generating methods are also presented. Based on Theory and Research – A comprehensive review and synthesis of existing research runs throughout the book and complements the expertise of its authors.

**Do Not Go Gentle Into That Good Night** Dylan Thomas 2016

**Nuclear and Radiochemistry** Gerhart Friedlander 1957

The Wrestling Simon Garfield 2013-03-21 This is a book about Kendo Nagasaki, Mick McManus, Les Kellett, Klondyke Kate and Dr Death - men and women who used to fight each other every night for pride and money. Margaret Thatcher once wrote adoringly to Big Daddy, and Frank Sinatra told Giant Haystacks that British wrestlers were the best entertainers in the world. The Duke of Edinburgh attended the live shows, expressing a preference for Johnny Kwango, who specialized in head-butts. Millions would watch this curious pursuit on television every Saturday afternoon. Many said it was a fake, yet many more didn't seem to mind. But then Big Daddy had a stroke, the commentator started making exploitation films and a plumber from Wolverhampton made an unexpected housecall on Kendo Nagasaki. They took it off the television shortly after wrestlers started dying during the bouts. These days, those who are left like to talk. 'Brilliant. Read *The Wrestling*. If you don't enjoy it I'll pull Giant Haystack's beard.'

Independent 'Masterful, funny . . . Packed with English eccentricity by the bucket-load, Garfield has fashioned a brilliant, barmy book from the most unpromising raw material.' FHM

**Consumed** Skyla Madi 2013-11-26 \*\*Mature Content Warning\*\* Recommended for ages 17+ due to language and sexual content. Olivia James has never been one to walk on the wild side, at least not until she meets Seth Marc-a cocky, sexy fighter at her father's gym. He's infuriating, nauseatingly addictive and she just can't seem to shake him. He's only been in town a short while and his name is already on everyone's lips. He's the kind of guy moms' warn their daughters about-the kind that leaves a trail of shattered hearts behind him and he has Olivia in his sights. Olivia has never met anyone as confusing as Seth and his hot and cold attitude constantly sends her reeling. She's never wanted anyone's touch so badly in her life, but having recently come out of a long term relationship diving into another is something she'd prefer to avoid. Determined for his touch, but not to let him under her skin, Olivia embarks on the most thrilling ride of her life.

**Ananse in the Land of Idiots** Yaw Asare 2006

**Elective Mathematics for Senior High Schools** George N. Frempong 2019-10-15 This book covers all the topics included in the syllabus for Elective Mathematics at the West African Senior School Certificate Examination. The purpose of this book is to provide students with tools they need to be successful in their elective mathematics course. The material is presented in relevant and easy to understand manner. The step- by- step worked examples and many varied exercises help students build their skills. The concise explanation of concepts makes the book excellent for students preparing for the West African Examinations Council examination in elective mathematics.

Academic Literacy Development Laura-Mihaela Muresan 2021-03-11 This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

Curriculum Landscapes and Trends Jan Van den Akker 2014-01-15

Medical Statistics Michael J. Campbell 1993-08-09 A revised and updated edition of a textbook on medical statistics which includes a new chapter on medical questionnaires and expanded sections on simple diagnostic tests, single case studies and factorial designs. The text makes use of the stem-and-leaf plot concept to illustrate distributions.

**WJEC Biology for A2: Study and Revision Guide** Neil Roberts 2017-04-07 Endorsed by WJEC, this Study and Revision Guide offers you high quality support you can trust. Written by an experienced teacher and examiner, it provides essential underpinning knowledge to recap

and revise as well as supporting the development of skills you need to correctly interpret and answer the new exam questions. / An exam practice and technique section offers advice on how exam questions are set and marked. / Plenty of practice questions are included with teacher commentaries. / Grade boost tips help refine exam technique, improve grades and avoid common mistakes. / Numerous diagrams clearly explain each concept. / Pointers focus on understanding and using the underpinning knowledge. / Key terms are clearly defined on each page. / Quickfire questions check and reinforce your understanding.

**Propagation and Reflection of Shock Waves** Fedor Vasil'evich Shugaev 1998 This volume deals with the

propagation of three-dimensional shock waves and their reflection from curved walls. It is divided into two parts. The first part presents a ray method. This is based on the expansion of fluid properties in power series at an arbitrary point on the shock front. Continuous fractions are used. Results for shock propagation in non-uniform fluids are given. The second part discusses the shock reflection from a concave body. The important shock-focusing problem is included. The work is supported by both numerical and experimental results. Many interesting features, such as formation of a jet, vortices and the appearance of disturbances on the shock front, are discussed. Besides shock waves in gases, the distinctive features of shock propagation through a weakly ionized plasma are considered.
