Albert Einstein and Relativity for Kids Jerome Pohlen 2012-10-01 Best known for his general theory of relativity and the famous equation linking mass and energy, E = mc², Albert Einstein had a lasting impact on the world of science, the extent of which is illuminated–along with his fascinating life and unique personality–in this lively history. In addition to learning all about Einstein's important contributions to science, from proving the existence and size of atoms and launching the field of quantum mechanics to creating models of the universe that led to the discovery of black holes and the big bang theory, young physicists will participate in activities and thought experiments to bring his theories and ideas to life. Such activities include using dominoes to model a nuclear chain reaction, replicating the expanding universe in a microwave oven, creating blue skies and red sunsets in a soda bottle, and calculating the speed of light using a melted chocolate bar. Suggestions for further study, a time line, and sidebars on the work of other physicists of the day make this an incredibly accessible resource for inquisitive children.

A Tale Told by an Idiot Richard Taylor 2013-02-28 This is a story about one man's struggle to overcome class discrimination, poverty, and abandonment in order to achieve success, wholeness, and recognition. It does not always make light reading, but as with anything in life, there are humorous elements. A mixture of narrative storytelling and academic investigation provides the necessary balance for discussing a difficult subject. From earliest childhood memories, the reader is taken through the commotion of school life and ultimately beyond into the world of work. There is a gradual reversal of roles, as the ideas applied to the writer in his youth are turned outwards upon his entourage, and subsequently, the rest of society. One need not always agree; but hopefully the book will provide at the very least food for thought, and demonstrate the limitations of any idea when taken to the extreme.
