What Universities Owe Democracy Ronald J. Daniels 2021-10-05 "This book identifies four distinct functions of American higher education that colleges and universities have acquired over the past two hundred years and that are integral to liberal democracy: social mobility, citizenship education, the discovery and communication of knowledge, and the cultivation of a pluralistic society. Each chapter takes up one of these functions to analyze and assess"--

NAFTA & Neocolonialism Laurence French 2004 This work is a study of the impacts of the North American Free Trade Agreement (NAFTA). By focusing on the issue of justice in the contexts of globalization and neo-colonialism, the book contributes to a broader discussion of the significance of NAFTA. Authors Laurence French and Magdaleno ManzanOrez emphasize cultural and ethnic issues in the relations of NAFTA partners and enrich treatment of the topic by bringing to bear sociology, political science, justice studies, psychology, and educational theory. The authors relate classical sociological theory to contemporary issues of social and criminal justice.

Experiencing Cities Mark Hutter 2015-12-22 This extraordinary text for undergraduate urban students is a reflection of Mark Hutter's academic interests in urban sociology and his life-long passion for

experiencing city life. His deep academic roots in the Chicago School of Sociology help inform and appreciate the variety of urban structures and processes and their effect on the everyday lives of people living in cities. This text, however, extends the Chicago School perspective by combining its traditions with a social psychological perspective derived from symbolic interaction and also with a macro-level examination of social organization, social change, stratification and power in the urban context, informed by political economy. This entirely new, 3rd Edition has a global outlook on city life, and a visual presentation unmatched among books in this genre.

Whitaker's Cumulative Book List 1975

The Encyclopædia of Sexual Behaviour Albert Ellis 2013-10-22 The Encyclopædia of Sexual Behaviour, Volume Two is an encyclopedia of sexual behavior and covers topics ranging from the linguistic aspects of sex to sex life in Latin America, sex in the literature, and sexual love. Laws on marriage and family and on sex crimes are also discussed, along with sexual perversions and the art of loving. Comprised of 52 chapters, this volume first deals with Judaism's attitudes and teachings on sex, particularly with regard to the sexuality of women, nudity, and prostitution. The reader is then introduced to the connection between language and sex; sex life in regions such as Latin American, the Orient, and the Soviet Union; and the portrayal of sex in literature. Subsequent chapters explore sexual love as opposed to altruistic love; marriage and family living; menopause and the menstrual cycle; movement and feeling in sex; the interrelationship of music and sex; and the effects of nutrition and health on sexuality. Other chapters focus on phallicism and sexual symbolism; planned parenthood around the world; the psychology of pornography; human reproduction; and sex in relation to race and Protestantism. This book will be of interest to psychologists and psychiatrists.
