Physical Geography for West Africa Harold Reginald Jarrett 1958

African American Literature Beyond Race Gene Andrew Jarrett 2006-04-01 It is widely accepted that the canon of African American literature has racial realism at its core: African American protagonists, social settings, cultural symbols, and racial-political discourse. As a result, writings that are not preoccupied with race have long been invisible—unpublished, out of print, absent from libraries, rarely discussed among scholars, and omitted from anthologies. However, some of our most celebrated African American authors—from Zora Neale Hurston and Richard Wright to James Baldwin and Toni Morrison—have resisted this canonical rule, even at the cost of critical dismissal and commercial failure. *African American Literature Beyond Race* revives this remarkable literary corpus, presenting sixteen short stories, novelettes, and excerpts of novels—from the postbellum nineteenth century to the late twentieth century—that demonstrate this act of literary defiance. Each selection is paired with an original introduction by one of today's leading scholars of African American literature, including Hazel V. Carby, Gerald Early, Mae G. Henderson, George Hutchinson, Carla Peterson, Amritjit Singh, and Werner Sollors. By casting African Americans in minor roles and marking the protagonists as racially white, neutral, or

ambiguous, these works of fiction explore the thematic complexities of human identity, relations, and culture. At the same time, they force us to confront the basic question, “What is African American literature?” Stories by: James Baldwin, Octavia E. Butler, Samuel R. Delany, Paul Laurence Dunbar, Frances Ellen Watkins Harper, Chester B. Himes, Zora Neale Hurston, Nella Larsen, Toni Morrison, Ann Petry, Wallace Thurman, Jean Toomer, Frank J. Webb, Richard Wright, and Frank Yerby. Critical Introductions by: Hazel V. Carby, John Charles, Gerald Early, Hazel Arnett Ervin, Matthew Guterl, Mae G. Henderson, George B. Hutchinson, Gene Jarrett, Carla L. Peterson, Amritjit Singh, Werner Sollors, and Jeffrey Allen Tucker.

Themes in Geographic Thought

(Routledge Revivals) Milton E. Harvey

2014-03-18 Themes in Geographic Thought, first published in 1981, explores in breadth and depth the interrelationships among the history of Geography, geographic thought, and methodology, specifically focusing on the interactions between geographical research and various contemporary philosophical schools: positivism, pragmatism, functionalism, phenomenology, existentialism, idealism, realism and Marxism. An attempt is made to synthesise Geography's historically rich tradition with the current diversity in approaches to the discipline, based on the belief that 'geographic thought', at any point in time, is a manifestation of the mutual influence between the prevailing philosophical viewpoints and the major methodological approaches in vogue. Each chapter presents an overview of the concrete ideas of a particular school of philosophy and stresses its relevance and impact on various aspects of Geography.

Human Transit Jarrett Walker 2012-07-29

Public transit is a powerful tool for addressing a huge range of urban problems,

including traffic congestion and economic development as well as climate change. But while many people support transit in the abstract, it's often hard to channel that support into good transit investments. Part of the problem is that transit debates attract many kinds of experts, who often talk past each other. Ordinary people listen to a little of this and decide that transit is impossible to figure out. Jarrett Walker believes that transit can be simple, if we focus first on the underlying geometry that all transit technologies share. In *Human Transit*, Walker supplies the basic tools, the critical questions, and the means to make smarter decisions about designing and implementing transit services. *Human Transit* explains the fundamental geometry of transit that shapes successful systems; the process for fitting technology to a particular community; and the local choices that lead to transit-friendly development. Whether you are in the field or simply a concerned citizen, here is an accessible guide to achieving successful public transit that will enrich any community.

Remaking Human Geography (RLE Social & Cultural Geography) Audrey Kobayashi 2014-01-23 This book highlights the increasingly important contribution of geographical theory to the understanding of social change, values, economic & political organization and ethical imperatives. As a cohesive collection of chapters from well-known geographers in Britain and North America, it reflects the aims of the contributors in striving to bridge the gap between the historical-materialist and humanist interpretations of human geography. The book deals with both the contemporary issues outlined above and the situation in which they emerge: industrial restructuring, planning, women's issues, social and cultural practices and the landscape as context for social action.

Essays on Spinoza's Ethical Theory

Andrew Youpa 2014-04 Thirteen original essays by leading scholars explore aspects of Spinoza's ethical theory and, in doing so, deepen our understanding of the richly rewarding core of his system. Given its importance to his philosophical ambitions, it is surprising that his ethics has, until recently, received relatively little scholarly attention. Anglophone philosophy has tended to focus on Spinoza's contribution to metaphysics and epistemology, while philosophy in continental Europe has tended to show greater interest in his political philosophy. This tendency is problematic not only because it overlooks a central part of Spinoza's project, but also because it threatens to present a distorted picture of his philosophy. Moreover, Spinoza's ethics, like other branches of his philosophy, is complex, difficult, and, at times, paradoxical. The essays in this volume

advance our understanding of his ethics and also help us to appreciate it as the centerpiece of his system. In addition to resolving interpretive difficulties and advancing longstanding debates, these essays point the direction for future research. Spinoza's enduring contribution to the development of ethical theory, to early modern philosophy, and indeed to early modern history generally, provide us with good reason to follow the lead of these essays.

Remaking Human Geography Audrey Lynn Kobayashi 1989 These essays are concerned with developing a dialogue between humanism and historical materialism in human geography, and to demonstrate the creative tension which emerges through the mediation of their different frames of reference.

Forde 2009 More than once upon a time Do
you believe in fairy tales? Many people do,
for fairy tales are all around us. But you
don't have to be a believer to enjoy the
delightful stories presented in this book.
These are the tales of those who have lost
their way and found it again by coming to a
knowledge of the truth or by overcoming in

adversity. Learn about the man who sued
God or about the girl who forgot how to fly.
Take a voyage beyond the cosmos and see
how a writer came to a revelation about
himself. Then, as did one weary space
traveler on holiday in an obscure corner of
the universe, you, too, may learn that the
world is broader and more available to you
than you ever dared to hope.
