The Challenge of Democracy: American Government in Global Politics Kenneth Janda 2021-01-01 Thoroughly updated through the 2020 election, Janda/Berry/Goldman/Schildkraut/Manna's THE CHALLENGE OF DEMOCRACY: AMERICAN GOVERNMENT IN GLOBAL POLITICS, 15th edition, explores how the clash of values surrounding freedom, order and equality characterize U.S. politics. It illustrates tensions between majoritarian and pluralist views of democracy across the political landscape and examines how U.S. political institutions and outputs compare to those in other countries. It also highlights the fragility of American democracy, the importance of norms in shaping how provisions of the Constitution work in practice and the ways that white supremacy have influenced political outcomes. New coverage includes the Trump administration, the COVID-19 pandemic, the rise of fake news, debates about healthcare reform, the impact of social media on political activity, gun control, immigration politics, and more. Engaging Communities Through Civic Engagement in Art Museum Education Bobick, Bryna 2020-12-25 As art museum educators become more involved in curatorial decisions and creating opportunities for community voices to be represented in the galleries of the museum, museum education is shifting from responding to works of art to developing authentic opportunities for engagement with their communities. Current research focuses on museum education experiences and the wide-reaching benefits of including these experiences into art education courses. As more universities add art museum education to their curricula, there is a need for a text to support the topic and offer examples of real-world museum education experiences. Engaging Communities Through Civic Engagement in Art Museum Education deepens knowledge on museum and art education and civic engagement and bridges the gap from theory to practice. The chapters focus on various sectors of this research, including diversity and inclusion in museum experiences, engaging communities through new techniques, and museum and university partnerships. As such, it includes coverage on timely topics that include programs and audience engagement with the LGBTQ+, refugee, disability, and senior communities; socially responsive museum pedagogy; and the use of student workers. This book is ideal for museum educators, museum directors, curators, professionals, practitioners, researchers, academicians, and students who are interested in updated knowledge and research in art education, curriculum development, and civic engagement.

Delivering Value with BIM Adriana X. Sanchez 2016-03-31 Building Information Modelling (BIM) is a global phenomenon which is gaining significant momentum across the world. Currently there is little information on how to realise and monitor benefits from implementing BIM across the life-cycle of a built environment asset. This book provides a practical and strategic framework to realise value from implementing BIM by adapting Benefit Realisation Management theory. It presents an approach for practitioners aiming to implement BIM across the life-cycle of built environment assets, including both buildings and infrastructure. Additionally, the book features: wide-ranging information about BIM, the challenges of monitoring progress towards benefit goals and the greater context of implementation; a set of dictionaries that illustrate: how benefits can be achieved, what the benefit flows are and the enabling tools and processes that contribute to achieving and maximising them; a suite of measures that can serve to monitor progress with examples of how they have been used to measure benefits from BIM; real-world examples from across the world and life-cycle phases that show how these benefits can be achieved; and information on international maturity and competency measures to complement the value realisation framework. Including a blend of academic and industry input, this book has been developed in close collaborative consultation with industry, government and international research organisations and could be used for industry courses on BIM benefits and implementation for asset management or by universities that teach BIM-related courses.
