Fighting the Dragon Sandra Kischuk 2012-11-01 For decades, traditional medicine had very little to offer for individuals suffering from multiple sclerosis and other autoimmune diseases. Today, medical science has brought us wave upon wave of immunomodulatory medications to try to slow disease progression. Unfortunately, these medications come with their own health- and life-threatening side effects. And sometimes, they just stop working. "Fighting the Dragon: How I Beat Multiple Sclerosis" is the story of one woman's thirty year battle with multiple sclerosis and what she did to reclaim her life when she realized she would need an assisted living facility within a few years. The book contains detailed descriptions of what worked and what did not, where she got the help she needed (and how the reader can locate these resources within his/her own community), and the logic behind the non-conventional therapies. "Fighting the Dragon" is a narrative of courage-courage driven by desperation, a story written by a patient who decided, when her neurologist told her, "You will never walk normally again," that she would dance. "Fighting the Dragon" is also a book the MS patient can take to his/her physician . . . it contains well-researched, easy-to-follow guidelines for what to do and how. The information is also applicable to a wide range of other autoimmune conditions, cancers, and AIDS. * * * * * Excerpt: . . . if your car kept breaking down and the mechanic you took it to kept doing the same thing to fix it-but it did not stay fixed, you would question the mechanic's competence. Maybe the mechanic pulled out a technical manual. "See. I fixed it exactly as the manual said. This is the industry-approved way to solve this problem." When the car broke down again a week later, would you be satisfied? Probably not. You might decide it is time to replace the car. But that might be too expensive. So, what to do? If you were smart, you would probably try to find a new mechanic. You might ask your friends who they would recommend. You might search on the Internet to see if other people had the same experience with their cars . . . and what caused the problem. You might telephone some repair shops to get some idea of what they thought the problem might be. If you found a new mechanic and that mechanic looked over the car and said, "I have a solution that

is not in any industry-approved repair manuals, but it is safe and it works,"-would you walk away and go back to the first mechanic who never got it right? Why is your health worth any less than your car? *Seaplane, Skiplane, and Float/Ski Equipped Helicopter Operations Handbook (FAA-H-8083-23-1)* Federal Aviation Administration 2011-02-08 From the Federal Aviation Administration, *Seaplane, Skiplane, and Float/Ski Equipped Helicopter Operations Handbook* provides the most up-to-date, definitive information on piloting water-related aircraft. Reference Guide to the International Space Station Gary Kitmacher 2010-11-01 The International Space Station (ISS) is a great international, technological, and political achievement. It is the latest step in humankind's quest to explore and live in space. The research done on the ISS may advance our knowledge in various

areas of science, enable us to improve life on this planet, and give us the experience and increased understanding that can eventually equip us to journey to other worlds. As a result of the Station's complexity, few understand its configuration, its design and component systems, or the complex operations required in its construction and operation. This book provides high-level insight into the ISS. The ISS is in orbit today, operating with a crew of three. Its assembly will continue through 2010. As the ISS grows, its capabilities will increase, thus requiring a larger crew. Currently, 16 countries are involved in this venture. The sophisticated procedures required in the Station's construction and operation are presented in Amazing 3D Graphics generated by NASA 104 pages of spectacularly detailed color graphics the Space Station as you've never seen it before!
