Seven Pillars of Wisdom T.E. Lawrence 2020-01-01 Because it seems almost impossible that one man can be this brilliant and do so much. A masterpiece of autobiography.

Journey to the End of the Night Louis-Ferdinand Céline 1988 When it was published in 1932, this revolutionary first fiction redefined the art of the novel with its black humor, its nihilism, and its irreverent, explosive writing style, and

made Louis-Ferdinand Celine one of France's--and literature's--most important 20th-century writers. The picaresque adventures of Bardamu, the sarcastic and brilliant antihero of Journey to the End of the Night move from the battlefields of World War I (complete with buffoonish officers and cowardly soldiers), to French West Africa, the United States, and back to France in a style of prose that's lyrical, hallucinatory, and

hilariously scathing toward nearly everybody and everything. Yet, beneath it all one can detect a gentle core of idealism.

The Age of Revolution

Orientalism Edward W Said 2016-10-25 'A stimulating, elegant yet pugnacious essay'—Observer In this highly acclaimed seminal work, Edward Said surveys the history and nature of Western attitudes towards the East, considering Orientalism as a powerful European ideological creation—a way for writers, philosophers and colonial administrators to deal with the 'otherness' of Eastern culture, customs and beliefs. He traces this view through the writings of Homer, Nerval and Flaubert, Disraeli and Kipling, whose imaginative depictions have greatly contributed to the West's romantic and exotic picture of the Orient. In the Afterword, Said examines the effect of continuing Western imperialism.

The Fortunes of Francis Barber Michael Bundock 2015-03-01 This compelling book chronicles a young boy's journey from the horrors of

Jamaican slavery to the heart of London's literary world, and reveals the unlikely friendship that changed his life. Francis Barber, born in Jamaica, was brought to London by his owner in 1750 and became a servant in the household of the renowned Dr. Samuel Johnson. Although Barber left London for a time and served in the British navy during the Seven Years' War, he later returned to Johnson's employ. A fascinating reversal took place in the relationship between the two men as Johnson's health declined and the older man came to rely more and more upon his now educated and devoted companion. When Johnson died he left the bulk of his estate to Barber, a generous (and at the time scandalous) legacy, and a testament to the depth of their friendship. There were thousands of black Britons in the eighteenth century, but few accounts of their lives exist. In uncovering Francis Barber's story, this book not only provides insights into his life and Samuel Johnson's but also opens a window onto London

when slaves had yet to win their freedom.

Western Imperialism in the Middle East 1914-1958 D. K. Fieldhouse 2006-04-06 The term 'Fertile Crescent' is commonly used as shorthand for the group of territories extending around the Rivers Tigris and Euphrates. Here it is assumed to consist of Syria, Lebanon, Jordan, Iraq and Palestine. Much has been written on the history of these countries which were taken from the Ottoman empire after 1918 and became Mandates under the League of Nations. For the most part the histories of these countries have been handled either individually or as part of the history of Britain or France. In the first instance the emphasis has normally been on the development of nationalism and local resistance to alien control in a particular territory, leading to the modern successor state. In the second most studies have concentrated separately on how either France or Britain handled the great problems they inherited, seldom comparing their

strategies. The aim of this book is to see the region as a whole and from both the European and indigenous points of view. The central argument is that the mandate system failed in its stated purpose of establishing stable democratic states out of what had been provinces or parts of provinces within the Ottoman empire. Rather it generated basically unstable politics and, in the special case of Palestine, one totally unresolved, and possibly unsolvable, conflict. The result was to leave the Middle East as perhaps the most volatile part of the world in the later twentieth century and beyond. The main purpose of the book is to examine why this was so.

[The Special Operations Executive \(SOE\) in Burma](#)
Richard Duckett 2017-10-30 In the mountains and jungles of occupied Burma during World War II, British special forces

launched a series of secret operations, assisted by parts of the Burmese population. The men of the SOE, trained in sabotage and guerrilla warfare, worked in the jungle, deep behind enemy lines, to frustrate the puppet Burmese government of Ba Maw and continue the fight against Hirohito's Japan in a theatre starved of resources. Here, Richard Duckett uses newly declassified documents from the National Archives to reveal for the first time the extent of British special forces' involvement - from the 1941 operations until beyond Burma's independence from the British Empire in 1948. Duckett argues convincingly that 'Operation Character' and 'Operation Billet' - large SOE missions launched in support of General Slim's XIV Army offensive to liberate Burma - rank among the most militarily significant of the SOE's secret missions. Featuring a wealth of photographs and accompanying material never before published, including direct testimony recorded by veterans

of the campaign and maps from the SOE files, *The SOE in Burma* tells a compelling story of courage and struggle in during World War II

The End of Development Andrew Brooks 2017-05-15 Why did some countries grow rich while others remained poor? Human history unfolded differently across the globe. The world is separated in to places of poverty and prosperity. Tracing the long arc of human history from hunter gatherer societies to the early twenty first century in an argument grounded in a deep understanding of geography, Andrew Brooks rejects popular explanations for the divergence of nations. This accessible and

illuminating volume shows how the wealth of 'the West' and poverty of 'the rest' stem not from environmental factors or some unique European cultural, social or technological qualities, but from the expansion of colonialism and the rise of America. Brooks puts the case that international inequality was moulded by capitalist development over the last 500 years. After the Second World War, international aid projects failed to close the gap between 'developed' and 'developing' nations and millions remain impoverished. Rather than address the root causes of inequality, overseas development assistance exacerbate the problems of an uneven world by imposing crippling debts and destructive neoliberal policies on poor countries. But this flawed form of development is now coming to an end, as the emerging economies of Asia and Africa begin to assert themselves on the world stage. *The End of Development* provides a compelling account of how human history unfolded

differently in varied regions of the world. Brooks argues that we must now seize the opportunity afforded by today's changing economic geography to transform attitudes towards inequality and to develop radical new approaches to addressing global poverty, as the alternative is to accept that impoverishment is somehow part of the natural order of things.

The Black Atlantic Paul Gilroy 1993 This text sketches a critical account of the location of black intellectuals in the modern world following the end of racial slavery. The book explores the reactions of black writers to modernity's colour-coded promises, demonstrating the value of a politicized post-modernism in re-reading black cultural politics and political culture. The lives and writings of key African Americans such as Martin Delany, W.E.B. Dubois, Frederick Douglas and Richard Wright are examined in the light of their experiences outside the US in Europe and Africa. Gilroy provides an extensive discussion of black vernacular cultures, especially music.

Divide and Fall? Radha Kumar 1997 Analyses the post-Cold War revival of ethnic partition in Bosnia, comparing it to earlier divisions of Ireland, India, Palestine, and Cyprus
The Global Cold War Odd Arne Westad 2007-03-01 The Cold War shaped the world we live in today - its politics, economics,

and military affairs. This book shows how the globalization of the Cold War during the last century created the foundations for most of the key conflicts we see today, including the War on Terror. It focuses on how the Third World policies of the two twentieth-century superpowers - the United States and the Soviet Union - gave rise to resentments and resistance that in the end helped topple one superpower and still seriously challenge the other. Ranging from China to Indonesia, Iran, Ethiopia, Angola, Cuba, and Nicaragua, it provides a truly global perspective on the Cold War. And by exploring both the development of interventionist ideologies and the revolutionary movements that confronted interventions, the book links the past with the present in ways that no other major work on the Cold War era has succeeded in doing.

Life in Tanganyika in the Fifties
Godfrey Mwakikagile 2009
Life in Tanganyika in the 1950s and a look at race relations between whites and black Africans and others in this East African country are some of the subjects covered in the book. It's full of human interest stories, including the author's. Born and brought up in Tanganyika, the author writes from personal experience. He also got the chance to ask many ex-Tanganyikans a number of questions about life in Tanganyika in the fifties. Many of them were born and brought up in Tanganyika during the same period the author was. And many others went to Tanganyika as children but grew up there. The ex-Tanganyikans he contacted lived in different parts of the world including Tahiti, Britain, Australia, New Zealand,

Canada, Italy, South Africa, Zambia, Zimbabwe, the United States, the Middle East, and Russia among others. And they all had interesting stories to tell about life in Tanganyika in the fifties. The perspectives they provided, and the memories they shared with the author about their lives in Tanganyika, are some of the most interesting aspects of this book which focuses on one of the most important periods in the history of Africa. The book is a primary source of information on how life was then in Tanganyika during one of the most important decades in the history of the country just before independence.

The Expedition of Humphry

Clinker Tobias Smollett 1785

Route for the Overland

Stage Jesse G. Petersen

2008-04 The 1859 exploration of the Great Basin by army topographical engineer James Simpson opened up one of the West's most important transportation and communication corridors, a vital link between the Pacific Coast and the rest of the

nation. It became the route of the Pony Express and the Overland Mail and Stage, the line of the Pacific telegraph, a major wagon road for freighters and emigrants, and, later, the first transcontinental auto road, the Lincoln Highway, now Highway 50. No one has accurately tracked or mapped Simpson's original route, until now. Jesse Petersen shows in

words, maps, and photos exactly where the explorer went. Sharing his detective-like reasoning as he walked or drove the entire trail west and Simpson's variant route returning east, Petersen takes readers on a mountain and desert trek through some of America's most remote and striking landscapes.
