Data Quality Problems in Army Logistics Lionel A. Galway 1996 There is a widespread agreement that the data in Army logistics information systems have severe quality problems. This study develops a classification scheme for data quality problems and applies it to several problem logistics data elements, primarily the End Item Code (EIC), a key data element in the Central Demand Data Base.

Dollars and Sense John R. Bondanella 2000 As the Army has implemented initiatives to improve its basic logistics processes, it has found that these processes are hampered by a financial management system that is slow and inaccurate and that creates errors and delays. This report documents analysis supporting the Army's effort to improve its logistics financial management (FM) processes using Velocity Management's Define-Measure-Improve methodology. In defining the FM process, researchers developed process maps that showed that the delivery of conflicting information from the supply and finance systems forces units to create time-consuming, manual reconciliation processes to determine their remaining budgets. Researchers identified metrics to measure performance. To improve the quality of price and credit information and eliminate the need for manual reconciliation, the researchers recommended that when a transaction is first undertaken the prices and credits should be used for all records of the transaction.

Pelvic Organ Dysfunction in Neurological Disease Clare J. Fowler 2010-11-04 Pelvic Organ Dysfunction in Neurological Disease describes the neurological control of human bladder, bowel and sexual function and then details the dysfunctions which may arise as a consequence of various neurological diseases. Easy to read, the book will be of value to any healthcare professional managing patients in whom pelvic organ functions have been compromised by neurological disease. The book provides a structured approach to present day understanding of the neurological control of pelvic organs and the investigation and management of each type of organ dysfunction. A unique feature of this book is that it addresses the impact of specific neurological disorders on all three functions. The authors have all been associated with the Department of Uro-Neurology at the National Hospital for Neurology and Neurosurgery, London since it was established 20 years ago. This book is a timely review of their accumulated knowledge and the latest literature.
