**Class Rules** James McEnaney 2021-09-08 Every single person in Scotland has some kind of stake in the effectiveness of the nation's schools, so in writing this book my goal was to explain the intricacies and inconsistencies of the system, and to explore its strengths and weaknesses, in a way that would make sense to as many people as possible. How much do we really know about the state of Scottish education? Why do inequalities continue to dictate the school experiences of children across the country? What can be done to address the problems in the school system? James McEnaney does what he claims pundits and politicians cannot or will not do... tell the truth about Scottish schools. Class Rules makes the key issues and information surrounding Scotland's education system accessible to all. McEnaney delves into the successes and failures of the Curriculum for Excellence, interrogates the rhetoric around closing the 'attainment gap' between the richest and poorest pupils, and considers the impact of the global Covid-19 pandemic. Most importantly, this book also looks to the future to ask what changes can be made to improve the system for young people across the country, and is a must-read for anyone interested in the future of schools in Scotland.
**Overtourism** Claudio Milano 2019-06-07 This book examines the evolution of the phenomenon and explores the genesis of overtourism and the system dynamics underlining it. The 'overtourism' phenomenon is defined as the excessive growth of visitors leading to overcrowding and the consequential suffering of residents, due to temporary and often seasonal tourism peaks, that lead to permanent changes in lifestyles, amenities and well- being. Enormous tensions in overtourism affected destinations have driven the intensification of policy making and scholarly attention toward seeking antidotes to an issue that is considered paradoxical and problematic. Moving beyond the 'top 10 things you can do about overtourism', this book examines the evolution of the phenomenon and explores the genesis of overtourism as well as the system dynamics underpinning it. With a rigorous scientific approach, the book uses systems-thinking and contemporary paradigms around sustainable development, resilience planning and degrowth; while considering global economic, socio-political, environmental discourses. Researchers, analysts, policy makers and industry stakeholders working within tourism as well as those within the private sector, community groups, civil society groups and NGOs will find this book an essential source of information.

**The Modern House** Jonathan Bell 2015 The modern House reflects upon the complicated relationship architecture has with the terms "Modernist", "Modernism" and "Modern" specifically in relation to the potent concept of the home, reflecting in part the narrative of how some of the most important examples of Modern houses were commissioned and built in the UK. These special examples of British Modernism include such progressive experiments on communal urban living as London's Isokon Building, completed in 1934 by eminent architect Wells Coates, and Berthold Lubetkin's Highpoint, which is today considered one of the most prominent examples of the early International Style. Compared with these urban enormities are private houses, such as the Laslett House in Cambridge, 1958, by the architect Trevor Dannatt, or the Winter House, designed by John Winter as his own residence. Included are an extended introductory essay by acclaimed architectural journalist Jonathan Bell, former architecture editor for Wallpaper* and contributing editor at Blueprint, and projects such as those designed by renowned architect Carl Turner, responsible for the low energy Slip House, a cantilevered sculptural abode of translucent glass, steel and concrete. With images of yet to be seen interiors and restorations, The Modern House illuminates the convergent characteristics of functionalism, truth to materials, flowing space and natural light within the Modern home as a space for living.
