Economist "Polman's new book with the sustainable business expert Andrew Winston...argues that it's profitable to do business with the goal of making the world better." – The New York Times Named as recommended reading by Fortune's CEO Daily "...Polman has been one of the most significant chief executives of his era and that his approach to business and its role in society has been both valuable and path-breaking." – Financial Times The ex-Unilever CEO who increased his shareholders' returns by 300% while ensuring the company ranked #1 in the world for sustainability for eleven years running has, for the first time, revealed how to do it. Teaming up with Andrew Winston, one of the world's most authoritative voices on corporate sustainability, Paul Polman shows business leaders how to take on humanity's greatest and most urgent challenges—climate change and inequality—and build a thriving business as a result. In this candid and straight-talking handbook, Polman and Winston reveal the

secrets of Unilever's success and pull back the curtain on some of the world's most powerful c-suites. Net Positive boldly argues that the companies of the future will profit by fixing the world's problems, not creating them. Together the authors explode our most prevalent corporate myths: from the idea that business' only function is to maximise profits, to the naïve hope that Corporate Social Responsibility will save our species from disaster. These approaches, they argue, are destined for the graveyard. Instead, they show corporate leaders how to make their companies "Net Positive"—thriving by giving back more to the world than they take. Net Positive companies unleash innovation, build trust, attract the best people, thrill customers, and secure lasting success, all by helping create stronger, more inclusive societies and a healthier planet. Heal the world first, they argue, and you'll satisfy your investors as a result. With ambitious vision and compelling stories, Net Positive will teach you how to find the inner purpose and courage you need to embrace the only business model that will matter in the years ahead. You will learn how to lead others and unlock your company's soul, while setting and delivering big and aggressive goals, and taking responsibility for all of your company's impacts. You'll find out the secrets to partnering with others, including your competition and critics, to drive transformative change from which you will prosper. You'll build a company that serves your people, your customers, your communities, your shareholders—and your children and grandchildren will thank you for it. Is this win-win for business and humanity too good to be true? Don't believe it. The world's smartest CEOs are already taking their companies on the Net Positive journey and benefitting as a result.

*Radar Instruction Manual* United States. Maritime Administration 2005 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

*A Narrative of the Expedition to Botany-Bay* Watkin Tench 2020-09-28 The expedition on which he is engaged has excited much curiosity, and given birth to many speculations, respecting the consequences to arise from it. While men continue to think freely, they will judge

variously. Some have been sanguine enough to foresee the most beneficial effects to the Parent State, from the Colony we are endeavouring to establish; and some have not been wanting to pronounce the scheme big with folly, impolicy, and ruin. Which of these predictions will be completed, I leave to the decision of the public. I cannot, however, dismiss the subject without expressing a hope, that the candid and liberal of each opinion, induced by the humane and benevolent intention in which it originated, will unite in waiting the result of a fair trial to an experiment, no less new in its design, than difficult in its execution. As this publication enters the world with the name of the author, candour will, he trusts, induce its readers to believe, that no consideration could weigh with him in an endeavour to mislead them. Facts are related simply as they happened, and when opinions are hazarded, they are such as, he hopes, patient inquiry, and deliberate decision, will be found to have authorised. For the most part he has spoken from actual observation; and in those places where the relations of others have been unavoidably adopted. He has been careful to search for the truth, and repress that spirit of exaggeration which is almost ever the effect of novelty on ignorance. The nautical part of the work is comprized in as few pages as possible. By the professional part of my readers this will be deemed judicious; and the rest will not, I believe, be dissatisfied at its brevity. I beg leave, however, to say of the astronomical calculations, that they may be depended on with the greatest degree of security, as they were communicated by an officer, who was furnished with instruments, and commissioned by the Board of Longitude, to make observations during the voyage, and in the southern hemisphere. An unpractised

writer is generally anxious to bespeak public attention, and to solicit public indulgence. Except on professional subjects, military men are, perhaps, too fearful of critical censure. For the present narrative no other apology is attempted, than the intentions of its author, who has endeavoured not only to satisfy present curiosity, but to point out to future adventurers, the favourable, as well as adverse circumstances which will attend their settling here. The candid, it is hoped, will overlook the inaccuracies of this imperfect sketch, drawn amidst the complicated duties of the service in which the Author is engaged, and make due allowance for the want of opportunity of gaining more extensive information.

*The Winning Way* Brian Tracy 2014-04-15 By definition, winning means that you competed and you came out ahead. Human nature requires us to compete in order to survive. Therefore, winning and survival have the element of success in common. Having your goal and setting yourself up to achieve your goal is the first step in the process. You adjust your mindset and begin to plan diligently. Goals may be as different as DNA, but methodologies have much in common. Furthermore, your plans and expectations will need adjustments as you go along. **Bringing E-money to the Poor** Thyra A. Riley 2017-09-11 Moving toward universal access to financial services is within reach, thanks to new technologies, transformative business models, and ambitious reforms. Instruments such as e-money accounts and mobile accounts, along with debit cards and low-cost traditional bank accounts, can significantly increase financial access for those who

are excluded. Bringing e-Money to the Poor: Successes and Failures examines the lessons of success from four country case studies of “gazelles†•Kenya, South Africa, Sri Lanka, and Thailand†•that leapt from limitation to innovation by successfully enabling the deployment of e-money technology. These countries have thereby transformed the landscape of financial access to their poor. In addition, two country case studies (Maldives and the Philippines) yield lessons learned from constraints that stalled e-money deployments. Because technology is not a silver bullet, the case studies also explore other strategic elements that need

to be in place for a country to expand access to financial services through digital technology.
