Republicans Buy Sneakers Too Clay Travis 2018-09-25 National Bestseller! Sports media superstar Clay Travis wants to save sports from the social justice warriors seeking to turn them into another political battleground. Have you ever tuned into your favorite sports highlights show, only to find the talking heads yammering about the newest Trump tweets or what an athlete thinks about the second amendment? The way Clay Travis sees it, sports are barely about sports anymore. Whether it's in the stadium or the studio, the conversation isn't about who's talented and who stinks. It's about who said the right or wrong thing from the sidelines or on social media. And we know which side is playing referee in that game. Having ruined journalism and Hollywood, far left-wing activists have now turned to sports. Travis argues it's time for right-thinking fans everywhere to put down their beers and reclaim their teams and their traditions. In *Republicans Buy Sneakers, Too* he replays the arguments he's won and lays out all the battles ahead. His goal is simple: to make sports great again. Travis wants sports to remain the great equalizer and ultimate meritocracy—a passion that unites Americans of all races, genders, and creeds, providing an opportunity to find common ground and an escape from polarizing commentary. He takes readers through the recent politicization of sports, controversy by controversy and untalented-but-celebrated hero by hero, and skewers outlets like ESPN which spend

more time mimicking MSNBC than covering sports. Travis hopes that if we can stop sports from being just another political battlefield, and return it to our common ground, we can come together as a country again.

The Very Last Seat on the Plane Gwendolyn Olmsted 2016-08-28 Less than twelve hours before take-off, after her brother called from far-off California, her place of original derivation, Gwendolyn booked a flight on Southwest Airlines, the only coterie of the aerial velocity where she was able to muster up a ticket for this kind of urgency. Urgency, because you see, Gwendolyn's Dad of forty odd years had just suffered a massive heart attack, declared legally dead for approximately one half hour, and through the fortune or misfortune of modern technology, first responders were able to bring him back to life, from a legal perspective only, the second Friday in June 2016 between the hours of 10:20 and 10:50 a.m. By the time Gwendolyn received news of this, it was Monday, and she could

not have been in a higher geographical location in Montana, on a National Bison Range, no less, crowded by snow covered mountain peaks. Returned home she did to Florida, on Tuesday. She booked a flight Wednesday night for Thursday before sunrise, arriving in Los Angeles at 9:50 a.m. Not knowing what to expect, and hoping for the best, yet in her heart, she knew... She knew she would be visiting her dad on his deathbed, and more than likely assisting in the advising of "pulling the plug," from life support. From Tampa to Las Vegas was tough: Flying out of tropical depressions always are. Yet, from Las Vegas to Los Angeles proved to be the last thing Gwendolyn had expected, as she seized the last seat on the plane in the very first row, left side, middle seat, between an old man in the aisle, and the window seat already inherited by a man, who was quite attractive, with model-type healthy hair, the darkest blue eyes she had ever seen, in his thirties, painfully fit, and although she found out later around the baggage belt, about 6'7" in height, who preoccupied his time by reviewing the Wisconsin volleyball athletes he coached on his portable electronic tablet. "Is this seat taken?" Gwendolyn asked both men, to her immediate left, referring to the seat in between them, yet more directed toward the man by the window.

In addition to the behind-the-scenes story and official records of the Competition, readers will discover intriguing mini-essays on the historical, aesthetic, technological, and

folkloric aspects of the paper airplane and on its startling implications for the future of aviation. Best of all, there are dozens of cut-fold-and-fly-them-yourself planes to experiment with. Combining real science with outright fun, this book appeals to paper airplane enthusiasts and would-be aviators of every age.
