Hav Jan Morris 2011-08-30 A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

Sensible Cruising Designs L. Francis Herreshoff 1991-01-01 L. Francis Herreshoff created some great yacht designs. His designs are marked by clean, sweeping lines and a simplicity of hull and rig that show that they have been drawn by a true artist. In each design, he strips away every non-essential and leaves the true elements of a masterpiece.

Saving Sailing Nicholas D. Hayes 2009-10-01 Participation in sailing is declining in America, down more than 40% since 1997 and 70% since 1979. In this provocative book, researcher and avid sailor Nicholas Hayes explains why. The book shows how pressures on free time have increased, and how, in response, many Americans have turned to extremes of spectator or highly structured activities . . . and away from lifelong, family-based, multi-generational recreation.Saving Sailing builds a case for choosing how to spend free time better, using it for quality experiences with families and friends through rewarding pastimes like sailing.The main challenge, the author suggests, is to develop an active system of mentoring, especially between generations.The lessons are broader than sailing, with useful ideas for all parents, for anyone seeking to strengthen the social fabric of American communities, and for those involved in programming for youth and adult activities.

The Computational Beauty of Nature Gary William Flake 2000-01-27 Gary William Flake develops in depth the simple idea that recurrent rules can produce rich and complicated behaviors. In this book Gary William Flake develops in depth the simple idea that recurrent rules can produce rich and complicated behaviors. Distinguishing "agents" (e.g., molecules, cells, animals, and species) from their interactions (e.g., chemical reactions, immune system responses, sexual reproduction, and evolution), Flake argues that it is the computational properties of interactions that account for much of what we think of as "beautiful" and "interesting." From this basic thesis, Flake explores

what he considers to be today's four most interesting computational topics: fractals, chaos, complex systems, and adaptation. Each of the book's parts can be read independently, enabling even the casual reader to understand and work with the basic equations and programs. Yet the parts are bound together by the theme of the computer as a laboratory and a metaphor for understanding the universe. The inspired reader will experiment further with the ideas presented to create fractal landscapes, chaotic systems, artificial life forms, genetic algorithms, and artificial neural networks.

Boatowner's practical and technical cruising manual Nigel Calder 2007 This book is the most comprehensive, helpful and up to date guide ever written on selecting, equipping and sailing a cruising yacht. Indispensable for prospective boat buyers and cruisers, whether coastal or world-girdling, it covers all the technical and practical aspects of cruising yachts and systems in one unique book. Nigel Calder, one of the most respected nautical how-to authors with extensive cruising experience and a rare ability to reduce complexities to simple explanations, explains not only how to select and equip a yacht for coastal or offshore cruising, but also how to sail and navigate it, addressing the concerns of beginners and experienced owners alike. This is the book the cruising world has welcomed as a must have reference. There is, quite literally, nothing else like it. 'The indispensable crew - no boat should sail without Calder aboard' Yachting Monthly 'This is the one book you would choose for your desert island shipwreck scenario - it would solve all your problems!' Kelvin Hughes

Understanding the Racing Rules of Sailing Dave Perry 2001

Steam Coffin John Laurence Busch 2010 Painstakingly researched, this book contains much never-before-published archival material, presented in traditional storytelling style while still adhering to the strict rules for historical revelation. The saga told chronicles the dawn of steam-powered vessels in the early 19th century, and the resistance to this first technology that allowed humans to artificially overcome Nature to practical effect. While the brilliant Robert Fulton's first "steamboats" proved their worth on rivers, lakes and bays, there was deep skepticism that such vessels were capable of overcoming the unpredictable powers of the sea. To prove that it was possible for such a craft to cross the Atlantic Ocean, Captain Moses Rogers designed not a "steamboat," but a "steamship," the first of its kind. To most mariners, however, this vessel named Savannah seemed so dangerous that they considered it nothing more than a "steam coffin."
