Cumming 2006-01-01 This book documents the results of a multi-year project that investigated the goals for writing improvement among 45 students and their instructors in intensive courses of English as a Second Language (ESL) then, a year later, in academic programs at two Canadian universities. The researchers present a detailed framework to describe these goals from the perspectives of the students as well as their instructors. The goals are analyzed for groups of students from particular backgrounds internationally, for changes over time, and in relation to the ESL and academic courses. The authors use activity theory, goal theory, various sociolinguistic concepts, and multiple data sources (interviews, observations, stimulated recalls, questionnaires, and text analyses) to provide a contextually-grounded perspective on learning, teaching, writing, second-language development, and curriculum policy. The book will interest researchers, educators, and administrators of ESL, university, college, and literacy programs around the world.

**What is the New Rhetoric?** Susan E. Thomas 2009-03-26 The Age of Information has spawned a critical focus on human communication in a multimedia world, particularly on theories and practices of writing. With the worldwide web impacting increasingly on academic and business communication, the need has never been greater for advanced study in writing, communication, and critical thinking across all genres, sectors, and cultures. In recent decades, the definitions of 'new rhetoric' have expanded to encompass a variety of theories and movements, raising the question of how rhetoric is understood and employed in the twenty-first century. The essays collected here represent variations on these themes, with each attempting to answer the title's deliberately provocative question, addressing particularly: -How the classical art of rhetoric is still relevant today; -How it is directly related to modern technologies and the new modes of communication they have generated; -How rhetorical practice is informing research methodologies and teaching and learning practices in the contemporary academy.

[Easy Researcher](#) Elizabeth Ferszt 2015-07-11 This intention of this little book is to make the college writing process easy; it is a book for both teachers and students of writing. The activities at the end of each chapter are designed to build traditional lesson plans around (for teachers), and are designed so that students can practice the skills in each chapter. The writing skills are scaffolded, building from chapter to chapter toward a full paper. This book relies on the work of other college writing texts which also intended to demystify the writing process; I have gleaned the best practices from each in hopes that short segments of a variety of approaches will respond to differences in learning styles, and to a range and scope of methods. It values synthesis above self-determination.

**The Analytical Writer** Adrienne Robins 1995-09 In [The Analytical Writing](#) Adrienne Robins explains college writing as a process of discovery, as a series of strategies that any college student can learn to apply. All strategies explained in this text are based on sound theories of teaching writing and on the patterns of successful writers. Writing and thinking should not be separated, and presenting only the steps without the accompanying explanation of how they influence thinking would be of little more help than having no method at all. By using this text the students will see as they plan, draft, and revise how their writing helps clarify their thoughts. This clearly written and engaging textbook is illustrated by real examples of student writing and appropriate cartoons. The second edition was revised and updated based on the large-scale evaluation of the first edition completed by professors and students. The new edition reflects four essential values: recognizing the diversity of writing processes, the necessity of peer and teacher interaction with the writer on drafts, the integration of writing and reading, and the appropriate uses of technology. Specific features of this second edition include: -new writing samples -electronic citation formats -updated library use chapter with technological guidance -concise paragraph chapter -revised introduction and conclusion chapter -rhetorical as well as grammatical explanations for punctuation usage -new cartoons -exercises drawn from students' papers -a condensed chapter on research papers -and an expanded, and clearer, chapter on special assignments and other writing tasks A Collegiate Press book
