Cambridge IGCSE® and O Level Business Studies Revised

Coursebook Mark Fisher 2018-04-30 This revised set of resources for Cambridge IGCSE, IGCSE (9-1) and O Level Business Studies syllabuses (0450, 0986, 7115) is thoroughly updated for first examinations from 2020. This coursebook contains exam-style case studies and stimulus material from businesses around the world - ranging from a social enterprise in China to a fast food outlet in Zimbabwe. These give an international view of the real world applications of Business Studies theory. This book provides comprehensive exam support with questions to help students practise and build their confidence with the subject. The final chapter gives revision tips and advice on writing well-structured answers. The answers to the coursebook questions are in the teacher's resource. For free revision support, go to the Cambridge University Press website.

Klara and the Sun Kazuo Ishiguro 2021 From her place in the store, Klara, an Artificial Friend with outstanding observational qualities, watches carefully the behaviour of those who come in to browse, and of those who pass in the street outside. She remains hopeful a customer will soon choose her, but when the possibility emerges that her circumstances may change for ever, Klara is warned not to invest too much in the promises of humans. In 'Klara and the Sun', Kazuo Ishiguro looks at our rapidly-changing modern world through the eyes of an unforgettable narrator to explore a fundamental question: what does it mean to love?

Written by an experienced author in an engaging and accessible style this Coursebook provides comprehensive coverage of the syllabus and contains lots of activities and practice questions to help students apply commercial theory, with up-to-date, real-life examples.

Olives and Olive Oil in Health and Disease Prevention Victor R. Preedy 2010-03-23 Long used in sacred ceremonies and associated with good health, the nutritional and health promoting benefits of olives and olive oils have been proven by an ever-increasing body of science. From cardiovascular benefits to anti-microbial, anti-cancer, antioxidant activity and effects on macrophages and apoptosis to cellular and pathophysiological process, olives and olive oils are proving important in many healthful ways. For example, reactive components in olive oils or olive oil by-products have now been isolated and identified. These include tyrosol, hydroxytyrosol, 3,4-dihydroxyphenyl acetic acid, elenolic acid and oleuropein. Oleic acid is the main monosaturated fatty acid of olive oil. These have putative protective effects and modulate the biochemistry of a variety of cell types including those of the vascular system. Some but not all components have been characterised by their putative pharmacological properties. It is possible that usage of these aforementioned products may have beneficial application in other disease. However, in order for this cross-fertilization to take place, a comprehensive understanding of olives and olive oils is required. Finding this knowledge in a single volume provides a key resource for scientists in a variety of food and nutritional roles. Key Features: * Explores olives and olive oil from their general aspects to the detailed level of important micro- and micronutrients * Includes coverage of various methodologies for analysis to help scientists and chemists determine the most appropriate option for their own studies, including those of olive-related compounds in other foods * Relates, in a single volume resource, information for food and nutritional chemists, pharmaceutical scientists, nutritionists and dieticians * Presents information in three key categories: General aspects of olives and olive oils; Nutritional, pharmacological and metabolic properties of olives and olive oil; Specific components of olive oil and their effects on tissue and body systems

Cambridge O Level Biology D. G. Mackean 2021-03-26

Cambridge O Level Commerce Alan Whitcomb 2016-03-25 Provide full coverage of the latest syllabus for examination from 2018 with a full-colour textbook written especially for the international student and endorsed by Cambridge Assessment International Education. - Provide thorough preparation for students' examination with a range of questions and activities that engage students while checking their understanding of the key concepts - Consolidate learning with structured and multiple-choice questions at the end of every chapter - Cater for all students' needs with a course that provides extra language support

Cambridge IGCSE® and O Level Geography Coursebook with CD-ROM Gary Cambers 2018-03-31 Cambridge IGCSE and O Level Geography has been written specifically for Cambridge International syllabuses 0460 and 2217. Filled with sources, graphs and case studies, the coursebook requires students to examine a range of information, helping to build their analytical skills. Written by highly experienced authors and Cambridge trainers, this coursebook is updated to support both Cambridge IGCSE and O Level students. It includes clear and practical support, case studies from 25 different countries, fieldwork ideas and a range of interesting content. The accompanying CD-ROM contains support sheets for the topics covered, outline maps and sample exam-style questions. Answers to the activities are in the teacher's resource.

Textile Technology and Design Abdulkerim Macar 2016-10-01 Textile as a material of daily use has been there for ages now and as an industry, it is one of the promising industries. Textile Industry will always be there as clothes are one of the basic human necessities. For making textile, there is always the need of textile designers who design the textiles. Textile design is basically the process of creating designs for knitted, woven or printed fabrics. Fabrics can be made by weaving and knitting and can be given basic decoration through printing. Textile designing is a technical process including different methods for production of textile. It includes both- surface design and structural design of a textile. Textile designer must have knowledge of yarn making, weaving, knitting, dyeing, finishing processes, and also knowledge about different types of looms, knitting machines, and printing processes. The designer's deep understanding of the technical aspects of production and the properties of fibers, yarns, and textile dyes help him in visualizing the end product. Textile Technology and Design describes the strategies and technologies that have propelled the forefront of apparel textile innovation. The concept of the textile technologies is intricately related to both, the manufacture and decoration. It addresses the critical role of the interior at the intersection of design and technology, with a range of interdisciplinary arguments by a wide range of contributors: from design practitioners to researchers and scholars.

Cambridge International AS & A Level Computer Science David Watson 2019-07-15 This title is endorsed by Cambridge Assessment International Education to support the full syllabus for examination from 2021.

The African Book Publishing Record 2005

Bioactive Lipids M. Pintado 2022-05-15 Bioactive Lipids presents bioactive lipids from a functional food development perspective. This book provides a direct line of information to the reader regarding bioactive lipids from a nutraceuticals and functional foods development perspective. Included case studies enable readers to understand the potential of several dietary lipids and the possibilities regarding their incorporation into several food matrices. Researchers, lecturers and students from the food science and technology and nutrition fields will find this book to be extremely useful in their work. Reviews the health benefits of several lipids and dietary sources, providing bioactive targets for therapeutical purposes Provides readers with the necessary tools for the development of new lines of research for supporting ongoing investigations with solutions for existing challenges Includes case studies to present solutions for bioactive lipids incorporation into food matrices, and consequently to functional foods and nutraceuticals development Cambridge IGCSE® and O Level Economics Coursebook Susan Grant 2018-02-08 Covers the Cambridge IGCSE syllabus (0455) and the Cambridge O Level syllabus (2281), first examination from 2020. This series helps students understand economic theory, terminology and principles. It matches the Cambridge IGCSE and O Level Economics syllabuses. The coursebook helps students apply tools of economic analysis, make judgements on economic issues, use basic economic numeracy and literacy, and take greater part in decision-making processes in everyday life. Sample questions provide opportunities for students to develop their evaluative skills. It provides a foundation for advanced study in Economics such as A Level. Answers to the coursebook and workbook questions are in the teacher's resource.
